Azure JIT Administration

Problem: Azure AD has too many administrators

Solution: Use JIT administration to make users admins as needed

Azure JIT Administration

Need a Premium P1, P2 or Enterprise Mobility + Security (EMS) E5

Only admins need the license

Turns on Azure Privileged Identity Management (PIM)

How Does it Work?

Global admin makes changes to PIM by creating policies

Junior admins log on as standard users

Requests are made for temporary admin rights

Global admin needs to either approve or allow policy to auto approve
